Any hints are getting the software to install on Windows 10? - Tried two PCs, but both resulted in an error, but no hints. I love Windows 10...

Hi,  
We can certainly try and help you resolve this issue, but we would need more information first.  
Please provide us with the following:  
1) One or more images (screenshots) of any errors encountered.  
2) Which version of Windows 10 are you running (home/pro/etc. and build). You can get this info by pressing **WIN key + R** and typing in the command **winver** and pressing [enter]. Please take a screenshot of that window, too (**ALT + PrintScreen** to take a screenshot of only the active window instead of the entire screen).  
3) Any other details about steps you've taken to install the software or try to resolve the issue.  
Please use the **Full editor** when you reply to attach your images to your post (see attached image for details).
