

Planetary Gearmotor DSMP420

This planetary gearmotor is a high quality motor-gear combination with the following features:

- Brush DC-Motor
- Gears in steel manufactured by milling process
- Sun wheel from extra hard bakelite for noise reduction
- Ball bearing and electrical noise suppression filter
- Backlash at no load $\leq 3^\circ$
- Radial load 10mm from flange $\leq 80\text{N}$
- Axial load $\leq 30\text{N}$
- Radial play $\leq 0,04\text{mm}$
- Axial play $\leq 0,3\text{mm}$
- Operating temperature -10°C to $+60^\circ\text{C}$

Encoder version available.

Attention: The gear reductions are from- or in round numbers. By interest please request the accurate values.

Dimensions

Option encoder:

Magnetic encoders (hall sensors) are available as an option. They have two channels with 90° phase shift. The diameter amounts to 42.5mm. The gearmotor's total length would thereby be increased by 16mm.

Additional technical data:

countable pulses per turn (2 edges)	2 x 5 pulses		JST PHR-6 P=2.0-4P Molex 09-50-3021 P=3.96-2P cable-length: 100mm	pin connections: 1 red : + motor 2 black : - motor 3 brown : encoder Vcc 4 green : encoder GND 5 blue : encoder A 6 purple : encoder B
Voltage	3,5 – 20VDC			
Output current per channel	5 mA
