

F= fuse box (fuse .5 A)

T = transmitter red light RB-Vel-126

★ = if possible I will remove it to have just 1 arduino

B N-O = (button Naturrally open)

P1 = potentiometer of esc  
 bldc Left pin to PS+ than PS+ to 5v (if needed from arduino). Right pin to PS – (than Ground to Arduino if needed), middle pin to 6 from (Arduino if needed)

P2= potentiometer of servos  
 ½ Left pin to PS+ than PS+ to 5v (if needed from arduino). Right pin to PS – (than Ground to Arduino if needed), middle pin to 3 from (Arduino if needed)
